SUMMARY

Web & Mobile Developer delivering scalable digital products across web and mobile platforms. Progressed from developer to Tech Lead, with a track record of driving technical direction, mentoring development teams, and managing end-to-end project delivery. Experienced in client requirements gathering, UX/UI shaping, and taking products from concept through to production release.

SKILLS

LANGUAGES

TypeScript JavaScript Dart

FRAMEWORKS

Angular Vue.js Flutter

MANAGEMENT & DESIGN

Technical Leadership UX / UI Design Req. Analysis
Client Relations Project Deployment

TOOLS & PLATFORMS

GraphQL RESTful API gRPC WebSockets
Auth0 Firebase Supabase Nx Pinia
Riverpod

EXPERIENCE

Tech Lead

2022 – Present

Goldeneye Technologies

- Lead a cross-functional team of developers across web and mobile projects
- Architect scalable solutions using Angular, VueJS and Flutter for enterprise clients
- Collaborate directly with clients to gather and refine project requirements
- Oversee end-to-end delivery from planning, design, development to production
- Experienced in releasing mobile apps to the Google Play Store (Android) and Apple App Store (iOS), including TestFlight distribution
- Conduct code reviews and establish best practices to maintain code quality
- Mentor junior developers, driving team growth and technical excellence

Web & Mobile Developer

2019 – 2022

Goldeneye Technologies

- Built responsive web applications using Angular and Vue.js with TypeScript
- Developed cross-platform mobile applications with Flutter and Dart
- Contributed to UX/UI design, creating intuitive and user-centered interfaces
- Participated in client meetings for requirements gathering and project updates
- Deployed and maintained applications across production environments

EDUCATION

Ho Chi Minh City University of Technology and Education

Bachelor of Engineering — Information Technology

KEY PROJECTS

Blooms & Brews

Mobile

Mobile Ordering App — Coffee & Flower Shop Chain

Tech Lead & Developer

- Shipped to production — live on the Google Play Store (Android)
- Built customer features in Flutter/Dart: product browsing, order customization, cart & checkout, vouchers, order history, EN/VI localization
- Managed state with Riverpod 3 (Notifier, sealed states, autoDispose); Clean Architecture with a check script enforcing layer dependencies
- Auth0 authentication with Bearer tokens and secure storage; GraphQL/JSON responses mapped to typed models and domain entities; mock-auth/mock-data mode for backend-free development
- Online payment via WebView with deep-link return; delivery/pickup time rules (lead time, opening hours)
- Used Claude Code to accelerate and streamline the development workflow — building AI-assisted tooling for code scaffolding, layer-rule checks and review

BurgerBot POS

Mobile

Restaurant Point of Sale

Tech Lead & Developer

- Distributed to internal users via TestFlight (iOS) for in-house restaurant operations
- Full POS workflow: table check-in → order → payment → receipt printing
- Bluetooth & LAN thermal printer integration (ESC/POS + Star Xpand)
- Auth0 OAuth 2.0 with multi-environment support & Firebase Remote Config
- Clean architecture: Entity → Interactor → Presenter → View with Provider

Logistics & Warehouse Counting

Developer

- Container counting with pre/post-loading verification dialogs
- Real-time defect photo capture with device camera
- Offline-resilient architecture with connectivity detection
- Landscape-optimized UI for warehouse tablet usage

Flutter

Dart

Provider

GraphQL

Nexus

Web

Enterprise ERP Platform

Tech Lead & Developer

- 9+ functional modules: Sales, QM, BOM, Procurement, Warehouse & more
- Multi-tenant Auth0 with role-based module visibility per tenant
- Vue i18n multi-language & LaunchDarkly feature flags
- Dynamic inspection & non-conformance workflows with timeslot scheduling

Vue 3
